

## Computing – Touch typing week 2

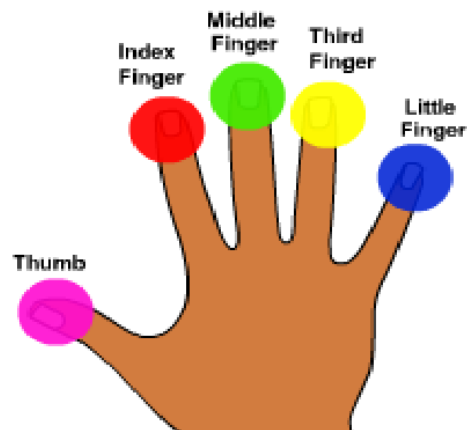

Continuing on from the keys you practised last week, we will begin to look at new keys to touch type. We will begin by look specifically at typing words with our left hand – only our left hand.

This will include five activities; left little finger, left third finger, left middle finger, left index finger and left hand keys.

We will then begin to look at the right hand – only our right hand.

This will include five activities; right little finger, right third finger, right middle finger, right index finger and right hand keys.

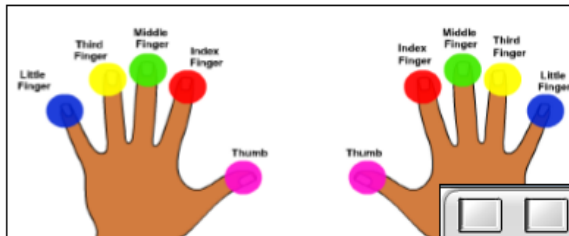

### Independent Practice

Each of the activities detailed above have been set as a 'to do' for you on Purplemash (if you cannot remember your log in, your parents/carers can contact your teacher for this). Using the timed game, see how quickly you can click on the correct key – you must use the correct finger!!

Keep a record of how many you get correct on each attempt, using the worksheet attached.

# FINGERS AND THE KEYBOARD

Look at the colours so you can work out which finger to use when you type a key

If anyone has problems with accessing their 'to do', try the following links:
