

Y3/4 – Interpreting Pictograms

Today we will carry on interpreting the data on pictograms.

Here is an example of a pictogram where children were asked what their favourite fruit was:

Using the data, I can compare and answer questions.

1. How many more votes did bananas get than grapes?

To answer this question, I need to know how many votes bananas got (5) and how many votes grapes got (1). The difference between 1 and 5 is **4** – so the answer is **4**.

Guided Practice

Use the pictogram above to answer the questions.

1. How many more votes did bananas get than pears?
2. Which fruit got 3 more votes than grapes?
3. Which fruit has 2 less votes than bananas?

Independent Practice

Go to https://www.softschools.com/math/data_analysis/pictograph/games/

Have a go at answering the questions.
