

Y3/4 – Representing Data with Pictograms

Today we are going to use the data you collected yesterday and turn that into a pictogram. We use pictograms to represent information that we have found out.

Here is the data I collected:

Favourite season	Number of votes
Winter	5
Spring	18
Summer	27
Autumn	10

Independent Practice

Create your pictogram! You can use 2Count or <https://primaryschoolict.com/pictograph/#> to do this.

Challenge: Draw your own pictogram on paper and use your times tables to make each picture represent a bigger number than 1.
