

Column Subtraction – Expanded

2 digit from 3 digit (no exchange)

When writing down calculations, separate the numbers into ones, tens, hundreds and thousands.

List the numbers in a column and always start subtracting with the ones first.

HELPFUL NOTE:

Make sure the biggest number goes on top. Otherwise you'll be going into negative numbers!

Tasks

First, watch Miss Bidecant's example video to remind yourself how to complete an expanded column method.

<https://www.youtube.com/channel/UC7XJ6Am7-Tdmnb6Vsn4vb9A/videos> - Look for Week 7, Year 3 Maths, Lesson 3.

Then, complete the calculations in your Home Learning book, showing the expanded method, as in Miss B's video. These calculations do NOT require an exchange.

1. $274 - 53 =$

2. $179 - 19 =$

3. $663 - 51 =$

4. $758 - 31 =$

5. $478 - 47 =$
