

YEAR 5/6 SCIENCE AND TOPIC SUGGESTED

ACTIVITIES WEEK EIGHT

GEOGRAPHY

LO: To recall facts about some English counties

Have a go at the third counties quiz found in the Week 8 folder. This quiz is based on some of the geographical and historical facts shared by Ms Cloughton in her 'campervan counties' videos. You may want to go to the school's youtube channel to watch some of the videos again. The quiz has questions about the 3 coastal counties covered during Week 6. Those counties were Lancashire, Suffolk and Hampshire. There is an answer sheet provided. Good luck!

LO: To identify continents, oceans, mountain ranges, rivers and landmarks across the world

Go to these BBC Bitesize activities: <https://www.bbc.co.uk/bitesize/articles/z4dxt39>
These geography activities will help develop your mapping skills and your locational knowledge on a global scale. There are some videos to watch and three suggestions for follow up activities. Enjoy the videos and have a go at the quizzes recommended for activity 1 and activity 3. (Activity 2 requires a printer so just give that one a miss!) An atlas might be useful to support your answers for activity 3 which includes locating mountain ranges, rivers and landmarks around the world.

HISTORY

LO: To compare school life today with school life in Ancient Athens

During the Autumn Term we found out a little bit about education in some of the Ancient Greek city states. Read through the information sheets about school life in Ancient Athens. At the end of the information, there is a quick retrieval quiz for you. In the Week 8 folder you will find a 'comparing school life' sheet to complete which compares education in Ancient Athens with your education now at Willingham Primary School. Use the information sheets to help you complete the table. There is a suggested additional diary writing task too.

SCIENCE

LO: To understand the terms 'atom' and 'element'

Go to: <https://www.dkfindout.com/uk/video/science/all-about-chemistry-video/> Watch the video then try to answer the questions in the follow up quiz in the Week 8 folder (an answer sheet is provided). Elements are listed in a scientific chart called the Periodic Table. We did look at this briefly in class last term. In the Week 8 folder you should find a Periodic Table and an Elements Quiz sheet. Have a go at completing the Elements Quiz and then check your answers using the separate sheet. If you are interested in chemistry and elements, you can find out more about the Periodic Table by following the link below:

<https://www.bbc.co.uk/newsround/46963919>

REMEMBER if you want to share your work or photos of your work, you can email your teacher using Purple Mash or ask a grown up to send it to your teacher's school email address
