

Answers- Year 1 Maths- Thursday

LO: To sort 3D shapes.

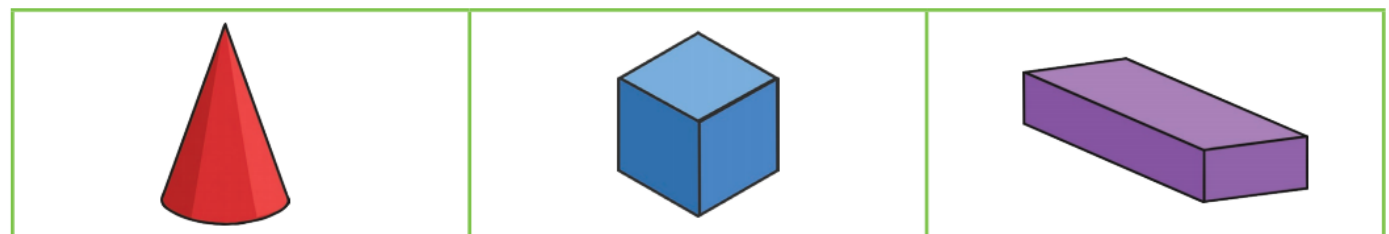

Which shape is the odd one out? Why? Write your answer in your workbooks.

The *pyramid* is the odd one out because *it only has straight edges*.

The *sphere* is the odd one out because *it is round and has no straight edges*.

The *cone* is the odd one out because *it has no straight edges*.

Challenge: Use three 3D shapes that you found in your house and describe how they are the same and different. Which shape is the odd one out? Why is it the odd one out?

Word bank	sphere	cone	cuboid
cube	pyramid	prism	cylinder
