

YEAR 5/6 SCIENCE AND GEOGRAPHY

SUGGESTED ACTIVITIES WEEK FOURTEEN

GEOGRAPHY

LO: To recall facts about the English county of Merseyside

Have a go at 'campervan counties' quiz 7. The questions are based solely on the information shared in Ms Cloughton's Merseyside video dated 12.06.20 on the school's youtube channel. You may want to watch this video again before you attempt the quiz. An answer sheet has been provided.

LO: To learn about the Alps

LO: To further develop your locational knowledge of the United Kingdom

Watch this short Loom video for instructions about this week's suggested geography tasks.

SCIENCE

LO: To represent the particles in pure substances and mixtures

This week we want you to continue to revisit the topic of physical and chemical changes. The Oak National Academy has produced some lessons on this topic and this week we would like you to complete lesson 2 'Represent the particles in pure substances and mixtures'. You will need a pencil, a ruler and your home learning book before you use this link and start the lesson: <https://classroom.thenational.academy/lessons/represent-the-particles-in-pure-substances-and-mixtures>

The lesson starts and ends with a retrieval quiz and there are regular opportunities for you to stop and check your answers throughout. Some of this content will be new to you but remember you can pause, rewind and restart the video as often as you need to.

REMEMBER if you want to share your work or photos of your work, you can email your teacher using Purple Mash or ask a grown up to send it to your teacher's school email address
